## urban Gospel

Millions of immigrants from Muslim nations live in Europe's great cities and many more are coming. Recent headlines are a strong message about the need, challenge and opportunity there is in reaching Europe's Muslims with the Gospel.

Craig leads a network reaching out to Europe's 50 million Muslims. It's a partnership between the US Assemblies of God World Missions, Global Initiative and the Pentecostal European Mission (PEM). This network resources and trains those reaching out to Muslim unreached people groups (MUPG). This resourcing ranges from helping to facilitate local outreaches to organizing thorough academic training. This enables Europe churches effectively love and share the Gospel with Muslim.

## fully effective missionaries

Missionaries are the most valuable resource we send to the world. However, missionaries that go to live overseas for the first time face many challenges, all at the same time. They must learn to live a place that works very differently from "home", follow customs and norms they do not understand and learn to speak a foreign language. Many struggle as a result of this first major overseas adjustment to become fully effective.

Dana is the Transition Coach for all new Assemblies of God missionary personnel going to Europe. She trains, coaches and encourages them in this critical major transition so that they can land well, fit well and do well. She describes it as, "...showing people how to walk on ice flows."

---

*To accomplish this combined mission of urban Gospel and fully effective missionaries, Craig and Dana return to Europe in April, 2015. They have served in Europe since 1985 and know Europe well. They've lived previously in Barcelona, Spain; Bucharest, Romania; and Thessaloniki, Greece and speak several European languages.*
